PROFESSIONAL SUMMARY

Dedicated and solution-oriented Full-Stack Web Developer with expertise in building scalable, responsive, and user-centric web applications. Proficient in the modern JavaScript ecosystem, specializing in React, Next.js, Node.js, and MongoDB. Strong passion for writing clean, maintainable code and solving complex technical challenges.

TECHNICAL SKILLS

Frontend Development
React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, DaisyUI, Shadcn UI, HTML5/CSS3

Backend & Auth
Node.js, Express.js, RESTful APIs, Better Auth, JWT Authentication, Serverless Functions

Database Management
MongoDB, Mongoose ODM, MongoDB Atlas, Database Schema Design, Aggregation Framework

Tools & Infrastructure
Git, GitHub, Vercel, VS Code, Postman, NPM/PNPM, Netlify Deployment

KEY PROJECTS

Bazar Dor – Daily Commodity Price Tracker
Next.js, TypeScript, Tailwind CSS, Node.js, MongoDB

A full-stack web application tracking real-time market price updates for essential daily goods.

- Implemented dynamic data rendering and responsive UI using Next.js App Router and Tailwind CSS.
- Designed secure RESTful API endpoints for daily price updates with MongoDB database aggregation.

FitLog – Personal Fitness & Workout Tracker
React.js, Node.js, Express.js, Better Auth, MongoDB

Interactive web platform allowing users to track workout routines, diet, and fitness milestones.

- Integrated Better Auth for secure user authentication, token persistence, and role management.
- Built an intuitive user dashboard with real-time statistics and goal progress visualizations.

Bangla News 70 – Modern Online News Portal
Next.js, Tailwind CSS, DaisyUI, REST API

High-performance news platform optimized for fast loading and mobile reading.

- Achieved high Lighthouse performance scores by leveraging Server-Side Rendering (SSR) and Next.js Image Optimization.

EXPERIENCE & JOURNEY

Full-Stack Development Projects — **2023 – Present**
Self-Driven Software Engineering & Open Source Projects

Engineered and deployed multiple full-stack production-ready applications. Focused on API performance, clean UI/UX, responsive design, state management, and robust backend integrations.

EDUCATION & TRAINING

B.Sc. in Computer Science & Engineering (or related) — Graduation / Expected
University / Institute Name, Bangladesh
